Dedicated to Specialty Blades and Edges Of All Types

We help you define the cutting edge!

REQUEST FOR QUOTATION

If you would like us to quote on a blade for you, please email or fax us your request with the following information.

And, since "a picture is worth a thousand words" please attach to your email or fax a print, drawing or sketch showing complete blade dimensions if available. We will reply as soon as possible.

1) Type of Material:

High Carbon Steel

superior edge sharpness; least expensive; good for industrial applications where corrosion resistance is not an issue

Stainless Steel

superior corrosion resistance; FDA approved for most medical and food processing applications; holds an edge longer than high carbon steel; slightly more expensive

Precipitation Hardening Steel

excellent corrosion resistance; FDA approved for most medical and food processing applications; more expensive than stainless steel

Tool Steel

M2, etc. excellent wear resistance; good for carpet and textiles where the material to be cut is extremely abrasive. This is the most expensive steel and not readily available in thickness under .025"

Other Material _____

brass, copper and other non-ferrous materials

2) Thickness: .006" to .060"

3) Quantity: Both initial and expected quantities

4.) Application or other Special Requirements:

5.) Contact Information:
